

Contract Manufacturing 2025

Let's work together to create
game-changing products that will
take your brand to the next level

Pharmacal offers full-service contract manufacturing of OTC, personal care, BOV continuous spray, and specialty products.

On site, Pharmacal features a microbiology and analytical chemistry laboratory, staffed with an experienced research and development team. We customize product according to our customer needs and guarantee regulatory compliance in a wide range of industries.

Pharmacal takes great ideas and offers ways to improve them. We can work with you to customize your existing product, or you can choose from our extensive offering of OTC, personal care, female health, first aid and many other formulations.

We have the expertise to respond quickly to your production needs and do so in a turnkey fashion. Our professionals manage every aspect of production ranging from lab work, to sourcing of raw materials and components, to scale-up and validation, to full-scale commercial production.

Pharmacal values our contract manufacturing and private label partners and looks to grow long term relationships. We understand that this can only be accomplished by providing outstanding customer service and superior quality product for you and your customers.
